

# **AMR exams in presence:**

## **Instructions for submitting the solution via Exam.net**

Bring with you:

- paper to write on
- laptop/tablet with internet access
- smartphone that can read QR coded and take photos

### **1. TEST**

Be sure to prepare well ahead the solution for the upload:

- Write in a clear and orderly fashion
- Try to use a single sheet for each problem (add a chart/plot sheet if needed)
- Label each sheet: "Problem 1", "Problem 1 charts", etc (your name is not necessary)

### **2. CONNECTING TO EXAM.NET**

At the end of the exam, use your laptop/tablet to connect as a "student" to

<https://Exam.net>

Exam key: will be given by the instructor

You will have to enter your first name, last name, and email (use your institutional account @studenti.uniroma1.it).

### **3. SUBMITTING YOUR SOLUTION**

- Click on "Scan solution" (Warning! if you click on "Submit exam" you will exit the test without sending a solution)
- Use your smartphone to read the QR code which appears on the computer screen
- From now on, follow carefully the instructions on your smartphone and computer
- When you take pictures of your solution: place the smartphone over the center of the sheet in "portrait" orientation; use a 4:3 aspect ratio; avoid shadows, rotations, perspective distortion, shaking, etc
- After uploading the photo of your first sheet by entering into the computer the code shown in your smartphone, you can upload the others by selecting "Scan solution" on the smartphone and entering a new code for each photo
- All the uploaded photos will appear in a single document in the text area of Exam.net. Check carefully that they are correctly oriented and clearly readable; check also the the ordering of the sheets is the right one
- When you are satisfied, click on "Submit exam"

### **4. SIMULATION**

To check that your configuration works, connect on [exam.net](https://exam.net) as a student using the following key: ipJwi5. This sample exam is always open.
